```

inTerminal:

npx create-react-app "name-project" z.B. npx create-react-app first

code "name-project" z.B. code first (um vscode zu öffnen, oder Ordner in vscode verschieben)

npm start
package.json

```
"scripts": {
  "start": "react-scripts start",
  "build": "react-scripts build",
  "test": "react-scripts test",
  "eject": "react-scripts eject"
},
```

useful snippets commands

```
imr-Import React
import React from 'react';
imrc- Import React, Component
import React, { Component } from 'react';
sfc-stateless function Component
const | = () => {
  return ( );
}
export default |
```

neues Projekt:

App.css leer machen
App.js: nur leeres div
